RE: Clarification of 1992 Price List

Motor Adapter Change

Beginning in 1992, Heco Inc. was able to combine two motor adapters for the Models 16, 20D, and 50D into one casting, code 2 into code 4, strengthening components without changing mounting dimensions. As you will see in the new price list, you must specify code 4 when ordering this motor adapter.

Model 20, Code 1 Shaft

The code 1 shaft for the Model 20 was omitted from the 1992 Price List in error and is still an available option for this unit at no charge.
